Product:	Zip Code Database – Deluxe
URL:	https://www.zip-codes.com/zip-code-database.asp
Download:	https://www.zip-codes.com/account_database.asp
Updates:	Monthly
Formats:	[MDB] Access
	[SQL] SQL Creation File
	[XLS] Excel
	[CSV] Comma Separated Values

Our ZIP Code Database contains over 78,000 precise data records. You can download the database once per month (if needed) for a full year. We have made every effort to provide the most accurate and up to date information.

Here are just some of the features that separate us from our competitors:

- Get 12 months of updates - we update our data each month
- Our data integrates with other applications seamlessly
- We are a licensed distributor of the U.S. Postal Service ZIP code data
- Immediate download
- Multiple data formats to suit your needs
- FTP Access for automated processing

Zip-Codes.com
Database Specifications

Database Fields

#	Field Name	Data Type	Description
01	ZipCode	Char(5)	00000-99999 Five digit numeric ZIP Code of the area.
02	PrimaryRecord	Char(1)	Character 'P' denoting if this row is a Primary Record or not. Absence of character denotes a non-primary record.
03	Population	Integer	The population of the ZIP Code based on 2020 Census data.
04	HouseholdsPerZipcode	Integer	The estimated number of households of the ZIP Code based on 2020 Census data.
05	WhitePopulation	Integer	The estimated White/Caucasian Population of the ZIP Code based on 2020 Census data.
06	BlackPopulation	Integer	The estimated Black/African American Population of the ZIP Code based on 2020 Census data.
07	HispanicPopulation	Integer	The estimated Hispanic Population of the ZIP Code based on 2020 Census data.
08	AsianPopulation	Integer	The estimated Asian Population of the ZIP Code based on 2020 Census data.
09	HawaiianPopulation	Integer	The estimated Hawaiian or Pacific Islander Population of the ZIP Code based on 2020 Census data.
10	IndianPopulation	Integer	The estimated American Indian and Alaska Native Population of the ZIP Code based on 2020 Census data.
11	OtherPopulation	Integer	The estimated Population of all other races for the ZIP Code based on 2020 Census data.
12	MalePopulation	Integer	The estimated Male Population of the ZIP Code based on 2020 Census data.
13	FemalePopulation	Integer	The estimated Female Population of the ZIP Code based on 2020 Census data.
14	PersonsPerHousehold	Decimal(4, 2)	The estimated average number of persons per household of the ZIP Code based on 2020 Census data.
15	AverageHouseValue	Integer	The median house value taken from ACS 2014-2018.
16	IncomePerHousehold	Integer	The median household income taken from ACS 2014-2018.
17	Latitude	Decimal(12, 6)	Geographic coordinate as a point measured in degrees north or south of the equator.
18	Longitude	Decimal(12, 6)	Geographic coordinate as a point measured in degrees east or west of the Greenwich Meridian.
19	Elevation	Integer	The elevation, measured in feet.
20	State	Char(2)	2 letter state name abbreviation.
21	StateFullName	VarChar(35)	The full US State Name.
22	CityType	Char(1)	Indicates the type of locale such as Post Office, Stations, or Branch.
23	CityAliasAbbreviation	VarChar(13)	13 Character abbreviation for the city alias name.
24	AreaCode	VarChar(55)	The telephone area codes available in this ZIP Code.
25	City	VarChar(35)	Name of the city as designated by the USPS.
26	CityAliasName	VarChar(35)	Alias name of the city if it exists.
27	County	VarChar(45)	Name of Primary County or Parish this ZIP Code resides in.
28	CountyFIPS	Char(5)	FIPS code for the County this ZIP Code resides in.
29	StateFIPS	Char(2)	FIPS code for the State this ZIP Code resides in.
30	TimeZone	Char(2)	Hours past Greenwich Time Zone this ZIP Code belongs to.
31	DayLightSaving	Char(1)	Flag indicating whether this ZIP Code observes daylight savings.
32	MSA	VarChar(35)	Metropolitan Statistical Area number.
33	PMSA	Char(4)	Primary Metropolitan Statistical Area Number.
34	CSA	Char(3)	Combined Statistical Area.
35	CBSA	Char(5)	Core Based Statistical Area number.

36	CBSA_DIV	Char(5)	Core Based Statistical Area Division.
37	CBSA_Type	Char(5)	Core Based Statistical Area Type (Metro or Micro).
38	CBSA_Name	VarChar(150)	Core Based Statistical Area Name or Title.
39	MSA_Name	VarChar(150)	Metropolitan Statistical Area name.
40	PMSA_Name	VarChar(150)	Primary Metropolitan Statistical Area name or Title.
41	Region	VarChar(10)	The Region of the United States this record resides in.
42	Division	VarChar(20)	The Division of the United States this record resides in.
43	MailingName	Char(1)	Yes or No (Y/N) flag indicating whether or not the USPS accepts this City Alias Name for mailing purposes.
44	PreferredLastLineKey	VarChar(10)	Links this record with other products ZIP-Codes.com offers.
45	ClassificationCode	Char(1)	The classification type of this ZIP Code.
46	MultiCounty	Char(1)	Flag indicating whether this ZIP Code crosses county lines.
47	CSAName	VarChar(255)	The name of the CSA this ZIP Code is in.
48	CBSA_Div_Name	VarChar(255)	The name of the CBSA Division this ZIP Code is in.
49	CityStateKey	Char(6)	Links this record with other products ZIP-Codes.com offers such as the ZIP+4.
50	CityAliasCode	VarChar(5)	Code indication the type of the city alias name for this record. Record can be Abbreviations, Universities, Government, and more.
51	CityMixedCase	VarChar(35)	The city name in mixed case (i.e. Not in all uppercase letters).
52	CityAliasMixedCase	VarChar(35)	The city alias name in mixed case (i.e. Not in all uppercase letters).
53	StateANSI	VarChar(2)	ANSI code for the State this ZIP Code resides in.
54	CountyANSI	VarChar(3)	ANSI code for the County/Parish this ZIP Code resides in.
55	FacilityCode	VarChar(1)	The type of locale identified in the city/state name.
56	CityDeliveryIndicator	VarChar(1)	Specifies whether or not a post office has city-delivery carrier routes.
57	CarrierRouteRateSortation	VarChar(1)	Identifies where automation Carrier Route rates are available.
58	FinanceNumber	VarChar(6)	A code assigned to Postal Service facilities.
59	UniqueZIPName	VarChar(1)	Field that specifies whether the City State Record contains the organization name for a unique ZIP Code.
60	CountyMixedCase	VarChar(45)	The county name in mixed case (i.e. Not in all uppercase letters).

Database Fields Information

1.) ZIP Code

5 digit ZIP Code as designated by the United States Postal Service. U.S. Territories are also included in our data. (Puerto Rico, American Samoa, etc.)

Zip-Codes.com
Database Specifications

2.) Primary Record

This column indicates the "primary" city name within a given ZIP Code. This is designated by the U.S. Postal Service and is based on mail delivery totals.

If you want to get only the "unique" U.S. zip codes, sort the data by this field. Your results will be all (approx.) 41,000 unique zip codes and all will be designated with a "p".

3.) Population

The population of the ZIP Code based on Census 2020 ZIP Code Tabulation Area (ZCTA) data column:

  DP1_0001C   Count!!SEX AND AGE!!Total population

4.) Households Per ZIP Code

Total estimated amount of households per ZIP Code based on Census 2020 ZIP Code Tabulation Area (ZCTA) column:

  DP1_0132C   Count!!HOUSEHOLDS BY TYPE!!Total households

5.) White Population

The estimate of White population per ZIP Code based on Census 2020 ZIP Code Tabulation Area (ZCTA) column:

  DP1_0078C   Count!!RACE!!Total population!!One Race!!White

6.) Black Population

The estimate of Black population per ZIP code based on Census 2020 ZIP Code Tabulation Area (ZCTA) column:

  DP1_0079C   Count!!RACE!!Total population!!One Race!!Black or African American

7.) Hispanic Population

The estimate of Hispanic population per ZIP Code based on Census 2020 ZIP Code Tabulation Area (ZCTA) column:

  DP1_0092C   Count!!HISPANIC OR LATINO!!Total population

8.) Asian Population

The estimate of Asian population per ZIP Code based on Census 2020 ZIP Code Tabulation Area (ZCTA) column:

DP1_0081C   Count!!RACE!!Total population!!One Race!!Asian

9.) Hawaiian Population

The estimate of Hawaiian/Pacific Islander population per ZIP Code based on Census 2020 ZIP Code Tabulation Area (ZCTA) column:

DP1_0082C   Count!!RACE!!Total population!!One Race!!Native Hawaiian and Other Pacific Islander

10.) Indian Population

The estimate of American Indian and Alaska Native population per ZIP Code based on Census 2020 ZIP Code Tabulation Area (ZCTA) column:

DP1_0080C   Count!!RACE!!Total population!!One Race!!American Indian and Alaska Native

11.) Other Population

The estimate of all Other Races population per ZIP Code based on Census 2020 ZIP Code Tabulation Area (ZCTA) column:

DP1_0083C   Count!!RACE!!Total population!!One Race!!Some Other Race

12.) Male Population

The estimate of the Male population per ZIP Code based on Census 2020 ZIP Code Tabulation Area (ZCTA) column:

DP1_0025C   Count!!SEX AND AGE!!Male population

13.) Female Population

The estimate of the Female population per ZIP Code based on Census 2020 ZIP Code Tabulation Area (ZCTA) column:

DP1_0049C   Count!!SEX AND AGE!!Female population

14.) Persons Per Household

Average number of individuals per household based on Census 2020 ZIP Code Tabulation Area (ZCTA). This value is achieved by taking the Total Population in Households and dividing it by the Total # of Households.

DP1_0113C   Count!!RELATIONSHIP!!Total population!!In households
DP1_0132C   Count!!HOUSEHOLDS BY TYPE!!Total households

15.) Median House Value

The median house value of this ZIP Code. The median house value comes from the American Community Survey 5 year estimate, 2014-2018. Updated annually.

Sort by this field to get the top house values by ZIP Code.

16.) Income Per Household

The median household income of this ZIP Code. The median household income value comes from the American Community Survey 5 year estimate, 2014-2018. Updated annually.

Sort by this field to get all the top household incomes by ZIP Code.

17.) Latitude

The geographic coordinate of a point measured in degrees north or south of the equator. Updated quarterly.

18.) Longitude

The geographic coordinate of a point measured in degrees east or west of the Greenwich (prime) meridian. Updated quarterly.

19.) Elevation

The elevation, measured in feet. Elevation is calculated for the ZIP Code Centroid (lat/lon) using USGC data. This will not be the elevation for all areas of the ZIP Code.

20.) State

The U.S. two digit state code. Sort on this field to get all your data grouped by state.

21.) State Full Name

The full U.S. state name. Sort on this field to get all your data grouped by state.

22.) City Type

Describes the type of postal station in the "City Alias" field:

Code	Description
A	Airport Mail Facility (AMF)

B	Branch
C	Community Post Office (CPO)
D	Area Distribution Center (ASC)
E	Sectional Center Facility (SCF)
F	Delivery Distribution Center (DDC)
G	General Mailing Facility (GMF)
K	Bulk Mail Center (BMC)
M	Money Order Unit
N	Non Postal Community Name
P	Post Office
S	Station
U	Urbanization
X	APO/FPO Military
Z	P.O. Box

1. A Branch or post office branch is a postal facility that is not the main post office and that is outside the corporate limits of the community.
2. A Community Post Office (CPO) is a contract postal unit providing services in a small community in which other types of post office facilities have been discontinued.
3. An Area Distribution Center (ASC) or processing and distribution facility (formerly known as a General Mail Facility) is a central mail facility that processes and dispatches incoming and outgoing mail to and from a designated service area.
4. A Sectional Center Facility (SCF) is a ASC for a designated geographical area defined by one or more three-digit ZIP code prefixes.
5. A Post Office, formerly known as a general post office or main post office, is the primary postal facility in a community.
6. A Station or post office station is a postal facility that is not the main post office, but that is within the corporate limits of the community.
7. An Urbanization is a facility type specific to Puerto Rico.

23.) City Alias Abbreviation

Abbreviation of the city alias where applicable.

24.) Area Code

The telephone area code(s) of the particular postal zone (ZIP Code). Sorting by this field will give you all the data grouped by area code.

25.) City

The primary city name as designated by the United States Postal Service.

26.) City Alias

The alias name(s) for the ZIP Code. This may be a city name, postal entity, community or a municipality name.

The city alias names are the reason why our database has approximately 78,000+ records. There are approximately 41,000 U.S. zip codes, but since we list each city alias within a zip code, we end up with almost double the number of records.

27.) Primary County Name

The primary county or parish where the ZIP Code resides. As with any of our data fields, you can sort the data by this field and the result will be data grouped by county.

28.) County FIPS

Federal Information Processing Standards code given to counties or parishes. This code simply identifies each U.S. county by its unique 4 digit code.

29.) State FIPS

Federal Information Processing Standards code given to each state or US territory.

This code simply identifies each U.S. state or territory by its unique 2 digit code.

30.) Time Zone

The code for time zone designation within the U.S. - the numbers 4-11 are assigned to the time zones.

Code	Description
4	Atlantic (GMT -04:00)
5	Eastern (GMT -05:00)
6	Central (GMT -06:00)
7	Mountain (GMT -07:00)
8	Pacific (GMT -08:00)
9	Alaska (GMT -09:00)
10	Hawaii-Aleutian Islands (GMT -10:00)
11	American Samoa (GMT -11:00)
13	Marshall Islands (GMT +12:00)
14	Guam (GMT +10:00)
15	Palau (GMT +9:00)
16	Micronesia (GMT +11:00)

31.) Daylight Savings

Flag indicating whether a zip code is on daylight savings.

32.) MSA Code

Metropolitan Statistical Area (no longer used by government - CBSA is the new standard).

MSA's were replaced by CBSA's in the 90's. We keep the old MSA's in our database because some of our older customers have mapped their data by this information and it makes it easier for them if we leave the data in the database.

33.) PMSA

Primary Metropolitan Statistical Area. This is the area that the Census Bureau designates as the "primary" area within a given MSA (no longer used by government - replaced by CBSA Division).

34.) CSA

Combined Statistical Area.

Consists of two or more adjacent core based statistical areas (CBSAs) that have an employment interchange measure of 15 or more. Updated when the Office of Management and Budget (OMB) releases a new delineation file - approximately every two years.

35.) CBSA

Core Based Statistical Area number (replaces old MSA's).

A Core Based Statistical Area is the official term for a functional region based around an urban center of at least 10,000 people, based on standards published by the Office of Management and Budget (OMB). These standards are used to replace the definitions of metropolitan areas that were defined in 1990.

A CBSA is broken into two sub categories, Metro and Micro, and are detailed in the CBSA Type Field. These are defined by their population densities. To be considered a Micro area, population must be between 10,000 and 50,000. To be considered a Metro area, population must exceed 50,000.

Updated when the Office of Management and Budget (OMB) releases a new delineation file - approximately every two years.

36.) CBSA Division

Core Based Statistical Area Division number.

A metropolitan statistical area containing an urbanized area of at least 2.5 million people can be subdivided into two or more "metropolitan divisions," provided specified criteria are met. Metropolitan divisions are conceptually similar the primary metropolitan statistical areas (PMSAs) defined under previous standards.

This field gives the sub-divided region number.

Updated when the Office of Management and Budget (OMB) releases a new delineation file - approximately every two years.

37.) CBSA Type (Metro/Micro)

Indication of whether a CBSA is Metro (over 50,000 population) or Micro (10,000 - 50,000 population).

Updated when the Office of Management and Budget (OMB) releases a new delineation file - approximately every two years.

38.) CBSA Name

Core Based Statistical Area Description Name.

Updated when the Office of Management and Budget (OMB) releases a new delineation file - approximately every two years.

39.) MSA Name

Metropolitan Statistical Area Description Name (no longer used by government - CBSA is the new standard).

40.) PMSA Name

Primary Metropolitan Statistical Area. This is the area that the Census Bureau designates as the "primary" area within a given MSA (no longer used by government - replaced by CBSA Division).

41.) Region

Census Division: A geographic area consisting of several States defined by the U.S. Department of Commerce, Bureau of the Census. The States are grouped into four regions and nine divisions. See also: Division

42.) Division

Census Division: A geographic area consisting of several States defined by the U.S. Department of Commerce, Bureau of the Census. The States are grouped into four regions and nine divisions. See also: Region

43.) Mailing Name

Yes or No (Y/N) flag indicating whether or not the USPS accepts this City Alias Name for mailing purposes.

44.) PreferredLastLineKey

This field is used to link to other Zip-Codes.com products.

45.) Classification Code

The classification type of this ZIP Code.

Code	Description	Includes
	Non-Unique	*Standard ZIP with many addresses assigned to it.*
M	APO/FPO Military ZIP Code	*Used for overseas military mail*
P	PO Box ZIP Code	*Having only Post Office boxes.*
U	Unique ZIP Code	*ZIP assigned to a single organization.*

46.) Multi County Flag

Flag indicating whether this ZIP Code crosses county lines.

47.) CSA Name

The name of the CSA (Combined Statistical Area) this ZIP Code is in. Updated when the Office of Management and Budget (OMB) releases a new delineation file - approximately every two years.

48.) CBSA Division Name

Core Based Statistical Area Division name.

A metropolitan statistical area containing an urbanized area of at least 2.5 million people can be subdivided into two or more "metropolitan divisions," provided specified criteria are met. Metropolitan divisions are conceptually similar the primary metropolitan statistical areas (PMSAs) defined under previous standards.

This field gives the sub-divided region name.

Zip-Codes.com
Database Specifications

Updated when the Office of Management and Budget (OMB) releases a new delineation file - approximately every two years.

49.) City State Key

This field is used to link to other Zip-Codes.com products. In products such as the ZIP+4 ZIP Code Database, you can match this column to the ZIP+4 PreferredLastLineKey for City Name, City Alias Names, Abbreviations, Population, and more.

50.) City Alias Code

This field is indicates what type the City Alias name is

Code	Description
{blank}	Any record that does not have any of the above codes in them is a regular non military, non business, non government, non university ZIP code.
A	Abbreviation - USPS designated abbreviation of a City Alias Name (ex. "Yorktown Heights"= "Yorktown HGTS" or "Yrktwn HTS", etc.)
B	Business - A specific business uses this zip code. This may be either exclusively or shared with a city. To determine if it is exclusive, look to the "Classification Code" column and if it has a "U" for Unique, it is exclusive to the particular business name in the "CityAliasName" field.
M1	Military Base - Actual U.S. military base non primary name as designated by the USPS.
M1P	Military Base Primary - Primary name of U.S. military base as designated by the USPS.
M2	Non Specific Military/Consulate - Military or Consulate ZIP code which is not specifically identified to any particular military base or consulate. These are used primarily for foreign military/consulate mail.
M2P	Non Specific Military/Consulate Primary - USPS designated primary ZIP code for foreign/consulate mail.
G	Government - A specific government entity uses this zip code. This may be either exclusively or shared with a city. To determine if the ZIP is exclusive, look to the "Classification Code" column and if it has a "U" for Unique, it is exclusive to the particular government entity name in the "CityAliasName" field.
U	University - USPS designated as a U.S. university. Not the primary record for this university.
UP	University Primary - Primary record for this U.S. university as designated by the USPS.

51.) City (Mixed Case)

The city name of the ZIP Code in proper case. The USPS designates cities in all uppercase (i.e. NEW YORK). The Mixed case fields turns this into proper upper and lower case letters (i.e. New York).

52.) City Alias (Mixed Case)

The city alias name of the ZIP Code in proper case. The USPS designates cities in all uppercase (i.e. NEW YORK). The Mixed case fields turns this into proper upper and lower case letters (i.e. New York).

53.) State ANSI Code

American National Standards Institute codes (ANSI codes) are a standardized set of numeric or alphabetic codes issued by the American National Standards Institute (ANSI) to ensure uniform identification of geographic entities through all federal government agencies. These standards replace the Federal Information Processing Standards (FIPS) codes previously issued by the National Institute of Standards and Technology (NIST).

This code simply identifies each U.S. state by its 2 digit code.

54.) County ANSI Code

American National Standards Institute codes (ANSI codes) are a standardized set of numeric or alphabetic codes issued by the American National Standards Institute (ANSI) to ensure uniform identification of geographic entities through all federal government agencies. These standards replace the Federal Information Processing Standards (FIPS) codes previously issued by the National Institute of Standards and Technology (NIST).

This code simply identifies each U.S. county by its 3 digit code.

55.) Facility Code

The type of locale identified in the city/state name. The facility may be a USPS facility, such as a post office, station, or branch, or it may be a non-postal place name. City/state name facility codes include the following:

    B = Branch
    C = Community post office (CPO)
    N = Non-postal community name, former USPS facility, or place name
    P = Post office
    S = Station
    U = Urbanization

56.) City Delivery Indicator

Specifies whether or not a post office has city-delivery carrier routes:
    Y = Office has city delivery carrier routes
    N = Office does not have city-delivery carrier routes

57.) Carrier Route Rate Sortation

Short for *Carrier Route Rate Sortation and Merged 5-Digit Indicator*

Identifies where automation Carrier Route rates are available and where the commingling of automation and non-automation mail, including Enhanced Carrier Routes and 5 digit presort, on the same pallet or in the same container is allowed. The values are A, B ,C or D and represent the following conditions:

A = Carrier Route rates are available (Y) and merging is permitted (Y).
B = Carrier Route rates are available (Y) and merging is not permitted (N).
C = Carrier Route rates are not available (N) and merging is permitted (Y).
D = Carrier Route rates are not available (N) and merging is not permitted (N).

58.) FinanceNumber

A code assigned to Postal Service facilities (primarily post offices) to collect cost and statistical data and compile revenue and expense data. The state number comprises the first two positions of the finance number.
The finance number can be used to match to records in other USPS files. By sorting these files by finance number, sequence matches can be made to use other street-level address information. For example, to use ZIP+4 product to obtain ZIP+4 codes for street addresses, a 5-digit ZIP Code, last-line number, or finance number for the street address must be known. The finance number can be obtained from the City State product.

For a street address such as "123 MAIN ST, SAN FRANCISCO CA," matching to the City State product will not provide a single 5-digit ZIP Code because San Francisco has more than one ZIP Code (i.e., it is a "multi-coded city"); However, the finance number for San Francisco can be obtained from the City State product. Then, by sorting the ZIP+4 product into finance number and street-name sequence, a match can be found to provide both the correct 5-digit ZIP Code and ZIP+4 code.

59.) Unique ZIP Name Indicator

Field that specifies whether the City State Record contains the organization name for a unique ZIP Code. If this field equals "Y," the organization name will appear in the City State Name field.

60.) Primary County (Mixed Case)

The primary county or parish where the ZIP Code resides. The USPS designates counties in all uppercase (i.e. NEW YORK). The Mixed case fields turns this into proper upper and lower case letters (i.e. New York).

Radius Finder Application

With all the features and more as our free online Radius Search, the ZIP-Codes.com ZIP Code Radius Search Application lets you run as many searches as you like, right from your computer.

It's free for all of our ZIP-Codes.com US ZIP Code Database Subscribers.

Features:

- Works with all ZIP-Codes.com U.S. ZIP Code Databases
- Unlimited Radius Searches
- Unlimited Radius Distance
- Custom radius points
- Copy and Paste into other applications
- Run searches for multiple ZIP Codes at the same time
- Export data to a CSV file
- Works on your computer
- Free to all ZIP-Codes.com Customers
- Free Customer Service

Zip-Codes.com
Database Specifications

Our Products

U.S. ZIP Code Databases
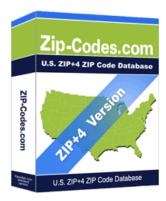

Three versions to choose from starting at $39.95.
Our Business ZIP Code Database contains over 78,000 precise data records and over 60 columns of useful data. You can *download the database for a full year* after purchase, making sure you are always up to date.

- Our data integrates with other applications seamlessly
- We specialize exclusively in U.S. ZIP Code data
- Download our database immediately after purchase

With over 60 columns of data, we give you more information and we charge less than our competitors. Our goal is to provide the most precise, cost effective, data rich zip code database in the world.
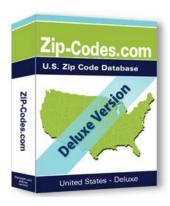

https://www.zip-codes.com/zip-code-database.asp

U.S. ZIP+4 ZIP Code Database

Every U.S. street and address range, with its related 9 digit ZIP code, put into row and column CSV format for easy use and manipulation. With over 50 unique fields of information and every 9 digit ZIP code in the United States, it gives you an unlimited number of ways to analyze all the U.S. ZIP +4 information. Great tool for address verification, building websites, geotargeting, and general analysis.

- Our data integrates with other applications seamlessly
- We specialize exclusively in U.S. ZIP Code data
- Download our database immediately after purchase

https://www.zip-codes.com/zip-plus-4-database.asp

U.S. Historical ZIP Code Databases

Ever wanted to compare data, or provide historical reports for your customers? Now you can with the Zip-Codes.com Historical ZIP Code Databases. Each month, our data is archived and provided for you to use at your discretion.

Our Historical ZIP Code Database contains over 78,000 precise data records and with 60+ columns of data, it gives you all the information you need.

Canadian Postal Code Databases

Three versions to choose from starting at $169.95.
Our Postal Code Database listing contains all current data regarding Canadian Postal Codes, area code, city name, two digit province code, province name, city type, time zone, daylight savings indicator, latitude, longitude, elevation. Our Canadian Postal Code Database also includes Census data for Canada including population and private dwellings for each FSA.

Our Postal Code Database is unique. You can download the database once per month (if needed) for a full year. We give you the choice of 3 separate formats (Access, Excel, and Comma Separated Values). Our database is updated each month to include the most current Postal Code data.
