Standard Database Specifications

Product Details

- Website:** <http://www.area-codes.com>
- Product:** Area Code Database – Standard
- URL:** <http://www.area-codes.com/area-code-database.asp>
- Download:** http://www.area-codes.com/account_dl_database.asp
- Updates:** Monthly
- Formats:** [MDB] Access
[TAB] Tab Delimited
[CSV] Comma Separated Values

Our **Area Code Database** listing contains all current data regarding Area Codes, NXX Exchange, city name, two digit state code, county name, FIPS, time zone, daylight savings indicator, latitude, longitude, Metropolitan Statistical Area (MSA), MSA description name, and more.

Our Area Code Database is **unique**. You can download the zip database once per month (if needed) for a full year. We give you the choice of 3 separate formats to download your Area Code data: Microsoft Access Database (MDB), Comma Separated Values (CSV), and Tab Delimited (TAB). Our database is **updated 3 times a year** to include the most current area code data.

Our Data includes **all NPANXX codes** for the US. (Canada and American Territories listed only for reference - not fully supported). Note that telecom data changes frequently; discrepancies will exist.

- Only online source to include ZIP Code info, provider company listings, and landline/wireless differentiation.
- Instantly download NPANXX data covering the entire US for immediate use (Canada and American Territories included for reference only.)
- Easily assign NPANXX codes to each of your sites for automated call routing.
- **NEW** - Additional lat/lon info provided for the center of the serving area - only online source of this valuable information.
- Includes inputs from the major telecommunications providers.

Database Fields

#	Field Name	Data Type	Description
01	State	Char(2)	Two letter USPS state abbreviation
02	NPANXX	Char(6)	Area Code (NPA = Numbering Plan Area) and Three digit local number prefix (X=2-9, X=0-9). Generally 201 thru 999.

Area-Codes.com Standard Database Specifications

03	LATA	VarChar(255)	Local Access Transport Area
04	ZipCode	VarChar(255)	The 5 digit US or 7 character Canadian Postal code assigned to this NPA/NXX.
05	ZipCodeCount	Integer	Approximate population of the ZIP code.
06	ZipCodeFreq	Integer	Percent frequency of occurrence of this Zip Code in the NPANXX area. If = 0, then unknown If = -1, then the ZIP Code is the most frequent, but % unknown If = -2, then the ZIP Code is the second most frequent, but % unknown
07	NPA	Char(3)	Area Code (NPA = Numbering Plan Area)
08	NXX	Char(3)	Three digit local number prefix (X=2-9, X=0-9).Generally 201 thru 999.
09	Flags	VarChar(35)	Any flags indicating specific things about this data record.

Data Flags

Data Flags indicate specific things about a particular row of data.

Flag	Meaning
S	The State for this record does not match the State for the ZIP Code. To keep with data reporting, the state for the Area Code is used.

Redistributable License

If you are developer looking to distribute our database with your product, then the redistribution license is what you need. With our unlimited, royalty free license, you can package it with any software you need such as store locators, demographic lookups, data validation, and use it for mobile devices. All licenses come with a full 12 months of updates.
